

Businesswhitepaper

ZillaSHIB:

Zillashib's story has an impact on the whole universe and the parallel universe
For zillashib's aircraft, even outside the universe, people call it zillashib
Taledogisa is a new gold coin chain. Technically, this is all its advantages
In dogcoin, decentralized, borderless, secure, anonymous, convenient and
Soon. In addition to the leading edge, zillashib will also increase and add new advantages
Advantages such as algorithm upgrade, exclusive ownership, no hidden cost and fast
Applications and. These were once used as short boards for dogcoin, but now they have
been used

Solve and improve unfair treatment.

Zillashib is widely used. Zillashib based on blockchain

Technology can be applied to all fields of more than 100 industries (finance, logistics,
New energy, education, public welfare, notarization, games, artificial intelligence and big
Data). It will be developed on everyone. I believe in

For most players of zillashib, these applications will be implemented.

Project highlights

Exclusive ownership

Controlling bitcoin requires a private key, which can be stored in any storage medium
Isolation. No change is required except for the user himself.

Decentralization

Bitcoin is the first distributed virtual currency. The whole network is a composite fuser
In the absence of a central bank, decentralization ensures the security and safety of
bitcoin

free

No hidden costs

As the payment method of atob, zillashib has no quantity limit
And procedures. If you know the other party's address, you can pay.

Global cycle
